### Anti-Spying Option

The Commander 2 is equipped with the Anti-Spying offline Permanent Disconnect option. An upgrade to physically remove connectivity and communication components to insure a 100% offline system for maximum security. The Anti-Spying option includes a removal of the webcam, removal of the microphone and removal of all internal wireless communications including WLAN and Bluetooth.

### External eGPU

The graphic power of the Commander 2 can be expanded with the connection of an eGPU via the Thunderbolt 3 port. Unlock the Commander 2’s full potential with the latest PCIe desktop graphics cards including NVIDIA GeForce RTX.
